Adaptive Components Pty Ltd

ABN: 3 423 735 133

At Adaptive Components, we work as an extension of your team to provide quality products to suit your requirements.

Our Quality Product Range

AMS Alpha Moving Message Displays

ALPHA LED programable message displays and interface equipment for industry, hospitality, entertainment, retail, call-centres etc... Applications are only limited by your imagination. At Adaptive Components we provide overall communication systems from the lobby to the loading dock, from the foyer to the meeting room. Decrease your downtime, increase efficiency and keep your business in motion. We help employees work smarter, not harder.

AMS SOFTWARE & INTERFACE DEVICES

AlphaNet Plus for Windows - schedule messages to appear at a designated on/off time, on a particular day of the week (7 day cycle)

Alpha Messaging Software - compose and send messages to your Alpha display with the touch of a button. Easy to use.

Beta Brite Messaging Software - WYSIWYG (what you see is what you get). The most user friendly software you will find. Enter messages and see your message as it will appear on your Beta Brite display.

Smart Alec - Intelligent Messaging Software - Access mission critical, real-time information using DDE, email, ASCII or serial interfaces. Indicate alarm conditions with changing colours, strobes or audible alarms.

Simply Theatre Software - An entire theatre communications system. Tie-in directly to your existing box office software and post real-time information. POS interface, multi-user security levels, load show schedule to the Web.

Alpha Ethernet Adaptor - Used to connect Alpha displays to 10BaseT and 100BaseT Ethernet LANS.

HMI ActiveX Control - Install AMS's 32 bit ActiveX control for Alpha displays into your HMI program and easily send event, fault messages and variable data automatically and directly via MSExcel, MSAccess, Citect, SAP etc.

Industrial Automation Networks - Connectivity to the Alpha family of 4000 and 7000 series displays in the industrial automation world. For alarm events, faults and other production data.

Alpha Discrete Input Interface - Trigger messages on any Alpha display simply and economically via PLC.

Ametek Rotron

Military specification, aeronautical and custom fans and blowers for aviation, naval and military applications or where you just can't take the chance with a lesser quality product.

VANEAXIAL & TUBEAXIAL FANS | CENTRIFUGAL & RADIAL BLOWERS | ELECTRONIC FAULT DETECTION DEVICES | MOTORS & DRIVE SYSTEMS

Baumer - Photoelectric & proximity sensors and encoders

Inductive & Capacitive Line - The Sensor of choice for numerous applications in Automation & Robotics. *Photo Line* - able to sense objects of almost any material, size and shape at distances ranging from 5mm to 40m depending on type and configuration used. *My-Com Line* - With a switching accuracy of 1 micron; that's only 40 millionths of an inch! *Ultrasonic Line* - If colour, material or surface properties of the targets for your sensing application are giving you headaches, then Ultrasonic sensing may be your relief.

Burgess - Precision limit and microswitches

Cescom

RS232-RS422/485 data communications interface equipment

Comair Rotron

COMAIR ROTRON is a leading manufacturer of standard and value added fans, blowers, AC and brushless DC motors for a broad range of markets, including medical, industrial, computer peripheral, automotive and office equipment.

CUSTOM COOLING | TACHOMETER OUTPUT OPTION | THERMA PRO-V TECHNOLOGY | FAN PERFORMANCE SENSOR | THERMAL SPEED CONTROL

CVS - Wall mount watertight metal enclosures - IP55

Surface finished with epoxy coating, Double gutter at door frame to prevent water from entering while door is opened and to increase rigidity

EV-Alert

EV-ALERT is a transmitter and receiving/decoding system that provides drivers with constant access to a special emergency radio frequency network. EV-ALERT is the electronic link to the emergency vehicle network and other road, industrial, mining and warehouse hazards. EV-ALERT overcomes visual and audible barriers.

On Road - A light on the dashboard of your car or truck pulses when an emergency vehicle or defined road hazard is within an approximate 300 metre vicinity. By alerting drivers ahead of a potentially hazardous situation the risk of an accident or fatality is dramatically reduced.

Industrial - Employees are alerted to forklifts in their immediate area via a flashing strobe and/or audible alarm, triggered by the forklifts transmitter or via their personal pager unit.

M-System

M-System, of Osaka, Japan, has been writing a unique history as a manufacturer specializing in "INTERFACE" equipment. M-System supply high-quality electronic equipment which meets the diverse requirements for signal conditioners, lightning arresters, Super-DCS, telemetry and remote I/O devices, which are needed to "INTERFACE" in the field of process and factory automation.

QMC

The new standard in sophisticated call-centre management software solutions. QMC is a rapid communication system that tells you what's happening with your Call Centre queues and allows you immediate management input.

Basic QMC uses LED Displays in key locations. Agents can see how many calls are waiting in their queue, and the colours tell them if it's OK to take a break and when they should log on again to meet high call demand.

Relays

- **Gerard Mang** - Impulse, time delay and timing relays, time switches
- **Idec/Izumi** - General purposes timers, PLC's, Pilot lamps & control panels, sensors,
- **Fisher Pierce** - Photocontrols for street lighting OLC's, metering test equipment
- **Smitt** - Onboard railway relays
- **Smart Series** - Monitoring relays
- **13R** - Auxiliary relays
- **700 Series** - Utility grade monitoring relays suitable for application in harsh electrical environments where noise immunity and high performance is required.

Telemecanique & Controls

Contactors, control relays, control & signaling devices, timer blocks and air circuit breakers. TELEMECANIQUE & CONTROLS is a decade old venture with Telemecanique of France, the world leader with 60 years of international experience in this field. The company manufactures widest range of Contactors, Overload Relays, Pneumatic Timers and Motor Starters to design, dimensions and technical specifications that are well accepted throughout the world.

Visolux

VISOLUX is a world leader in the manufacture and application of photoelectric controls. Their prestigious reputation for quality, reliability and total customer services has been built up over a period of more than 40 years. Today VISOLUX is a leading manufacturer of optoelectronic sensors and control devices.

PHOTOELECTRIC SENSORS | LIGHT BEAM CURTAINS & SWITCHES | REFLECTION LIGHT SCANNERS | BACKGROUND SUPPRESSION SCANNER | COLOUR MARK SCANNER
